EJD Viewpoint

Maria Ana A. Frazão
Index

1- UEMS – OH Section – TOP 5
2- EJD
  2.1 – Aim
  2.2 – Policies
  2.3 – Project and workshop
  2.4 – Proposals
3- JD – Occupational medicine
1 – Social, legislative and methodological - (A1 to A6);

2 – Health, in a broader and stricter sense, including mental one, and particularly occupational diseases (B1 to B4);

3 – Occupational Medicine and problems related to its learning and development (C);

4 – Ageing and disability (D1 to D2);

5 – A final concern is the economic and social development (E).
Safeguarding the interests of Junior Doctors in Europe by improving:

• Working conditions
• Mobility in the profession
• Set standards regarding the quality of postgraduate medical training.
Statement on Funding of Medical Training:

Health Care Systems in Europe:

Organization

Financed medical education

Post-graduation training

Basic elements
Statement on Funding of Medical Training:

- Basic Medical Education
- Physicians with broad knowledge and well-developed clinical skills
- Universities must be:
  - equipped
  - reasonable teacher to student ratio.
- Health Care system must provide quality and resources during specialization

- There should not be any financial obligations that inhibit the pursuit of Basic Medical Education.
Statement on Funding of Medical Training:

- Clinical clerkships or research projects must:
  - have same conditions as other employees
  - be paid adequately
  - have standards and quality guaranteed
  - be supervised by the national responsible authorities.

- **Opposition** to the obligation to stay in the country, region or place after concluding:
  - Basic Medical Education or
  - Specialization
Statement on Curricula and Assessments

9th of November, 2013, Heidelberg, Germany

- the continuous progress-control in the process of medical training must be in higher priority than single final exams, therefore in-training evaluation and formative assessment are primarily supported

- in-training progress must be continuously recorded and comparable regarding the free mobility of physicians in Europe

- using ePortfolio’s is highly recommended

- quality assurance systems must be implemented in medical training
Statement on Curricula and Assessments

- There should be national authority responsible for the quality of medical training and curricula and assessments must be approved by them.

- Exams and assessments should be:
  . free of charge for the participants
  . available in the national language of the training country
  . no mandatory further exams for specialization than the national ones
Statement on Curricula and Assessments

- The venue of exams and assessment must be easy accessible and at short travel time distance

- Final exams or assessments must be available to be taken more than once a year

- Competencies and milestones should be clearly set at the beginning of the training.
European Medical Mobility Project (EMM)

- The main EMM goal is to facilitate training in the medical field within Europe through an online database with a regular update system.

- The EMM website will gather official information regarding Junior Doctors training and working conditions to encourage mobility in Europe.
- Site with more and concise information

- Promotion and involvement of all JD in EU about EJD

- Meetings promotion and assured involvement

- Benchmarking of good international practice

- Advocacy in UE and other countries – sharing information
- Broader awareness of research projects, papers and books

- Improvement on access to presentations, articles and posters during post-graduate training

- Granting awards to outstanding JD

- Better awareness of EJD’s representatives in each country

- Create Key Performance Indicator (KPI)
Proposals

- Seminars and conferences with key speakers

- Improve conditions for medical training

- Immediate intervention on economic crisis and current burnout

- To do away with to the unacceptable overworking of trainees

- Improve the recognition and promotion of good practices
- Ideas after UEMS section:

1. To know about the training programm in EU
2. To know about their intern issues/problems
3. Proposals of improvement

I request the contact of all representatives trainees of Occupational Medicine of each UEMS country.

The end

Thank you for your attention

Maria Ana A. Frazão
EJD – my point of view
Reconhecimento e intercomunicação dos EJD

- Site com toda a informação e objectivos
- Reuniões entre responsáveis e rede
- Benchmarking de boas práticas internacionais
- Advocacy na UE e Países
- Foruns de Trabalho
- Investigação
- Prémios Jovens Talentos
- Conferências e Seminários com os melhores do mercado
- Livro, Papers, outros
- Medir o impacto de demonstrar, criar KPIs
- Fundar Associações de juniores doctors por país e criar ligações internacionais
- Consequent Burn-out
- pay adequately work position and appropriate in their efforts
As an Occupational Junior doctor (JD)

- Prevention of accidents – study says that interns (JD) are the population with more reported accidents
- Work conditions - are poor
- No funding to improve work conditions
- Workers are unsatisfied
- Burn-out
- Temporary incapability to work is abused and overestimated
